Scared About Security

How do you know your program is enough?

WE KNOW WHAT KEEPS YOU UP AT NIGHT

Cybersecurity feels like a never-ending game of whack-a-mole—every threat you block, another one pops up. The stakes? Your data, your reputation, and your peace of mind. You've invested in security, but is it enough? Are you overprotected in one area and exposed in another? The uncertainty can be terrifying.

NEW THREATS

Cyber scams are on the rise, becoming more sophisticated with AI. From crypto fraud and wire scams to robocalls and personal exploitation, no one is immune. In late 2024, Fidelity Investments faced a digital check fraud scheme costing hundreds of millions and leading to stricter deposit holds. Real estate fraud has grown so pervasive that stricter ID checks and in-person closings are becoming the norm. These evolving threats demand adaptive, robust security measures.

WE ARE A TRUSTED PARTNER

Mavenspire protects organizations like yours through a holistic approach to security—covering technology, people, and processes. We partner with market leaders like Cynet and Acronis, ensuring you benefit from cutting-edge security solutions you can trust. Our tailored strategies address your unique challenges, offering proven results in breach prevention and compliance. Sleep easier knowing your security is in expert hands.

THE PROBLEM

Threats are evolving faster than ever. Yesterday's antivirus isn't enough for today's ransomware. Most organizations have security gaps they're not even aware of. Compliance doesn't equal security—meeting regulations is just the starting line. Too many tools and no cohesive strategy lead to wasted resources and exposure.

TRUSTED TOOLS

At Mavenspire, we rely on industry-leading tools to safeguard your organization against evolving threats. How do we know? We constantly review scores from independent tests, such as MITRE ATT&CK, that measure detection and response capabilities against evolving attackers. We pair these insights with operational testing and choose partners like Cynet and Acronis, who deliver superior outcomes with less tool sprawl. Together, these tools form a powerful defense while providing operational simplicity, enabling us to address your security needs with precision and reliability.

WHAT "ENOUGH" LOOKS LIKE

Threat Detection: Ensure you're catching threats in real-time or before the damage is done.

Risk Mitigation: Have controls in place to reduce the impact of inevitable breaches.

Identity Management: Prevent unauthorized access to sensitive data.

Device & Firewall Management: Secure every endpoint and network entry point.

Employee Awareness: Ensure your users are your strongest link, not your weakest.

Backup & Disaster Recovery: Get back to work without losing a beat.

Mavenspire

SMARTaaS SECURE: Three Editions for Every Need

Our SMARTaaS Secure offerings provide a scalable, as-a-service approach to security. Essentials delivers the foundational tools for threat detection, managed risk, and basic device management. Premium adds advanced features like extended detection andresponse (XDR), identity management, and employee awareness training to create a more robust solution. Premium Plus is the ultimate package, offering all Premium features plus advisory services and compliance support, ensuring you're covered from every angle.

CYBERRISK ASSESSMENTS: Identifying Gaps Before They're Exploited

A CyberRisk Assessment is your first step in understanding where vulnerabilities lie. Our experts analyze your current security posture, evaluating technology, processes, and compliance alignment. From identifying third-party risks to assessing ransomware readiness, we provide actionable insights to close gaps and enhance your defenses. This proactive approach ensures you're not caught off guard by emerging threats.

COMPLIANCE EXPERTISE: Navigating Complex Regulations

Navigating regulatory landscapes like HIPAA, PCI, NIST, and CMMC can feel overwhelming. Mavenspire simplifies this process by offering deep expertise in these compliance frameworks. Whether you need guidance on achieving certification, meeting audit requirements, or implementing policies and procedures, our team ensures your organization is compliant and prepared to withstand scrutiny. Compliance isn't just about avoiding fines—it's about building trust and resilience.

Managed Service

Mavenspire has managed offerings to offload some of the most difficult and intensive tasks in IT operations.

Recovery

Goal - Get back to work (even after a catastrophe) Combining backup, data security, and disaster recovery into one turn-key service

Secure

Multi-layer program addressing: Threat Detection, Risk Mitigation, Identity Management, Device & Firewall Management, and Employee Awareness

FaaST

Performance management of Applications, Infrastructure, and Networks

CommanDaaS

- Data Governance
- Self-Service / Automation
- Compliance

Adaptive

Mavenspire is adept at "Filling the Gap". We are often asked to take parts of our offerings to offload and fill in gaps for our clients
